

Ugaritic Unicode Transliteration Keys

In Windows: Alt-X-Num (Dec) or Alt+-Hex (Hex)

-Note Windows may require HKEY_Current_User/Control Panel/Input Method, set EnableHexNumpad to "1" to use Hex

In Linux: Ctrl-Shift+U+Num (Hex)

Note Windows can only go up to 255 in Decimal. Anything above requires the Special Character screen. Linux does not have this limitation

Hex values shown, Windows Decimal shown in () where applicable.

ʔ = 294

ʕ = 295

ā = 101

â = e2 (0226)
